Kelly Building Fire January 11th 1911

ONE of the greatest questions occupying the attention of the business world today is: the way and means of decreasing the extraordinarily large amount of

Fire Waste

When you consider that the total fire waste for Canada alone was over \$23,000,000 for the year 1910, an amount equal to over \$3.00 per head per annum, it would seem that an investigation for the purpose of ascertaining the best systems for Fire Protection and the adoption of the same would help to a great extent to decrease the amount of loss.

Compiled and Published by

Henderson Directories Alberta Limited

CALGARY, ALBERTA

Entered according to Act of Parliament of Canada, in the year One Thousand Nine Hundred and Eleven by the Henderson Directories Alberta Limited, in the Office of Minister of Agriculture.

Preface

THE twenty-eighth edition of Henderson's Alberta Gazetteer and Business Directory is herewith presented to its patrons and the general public with the assurance that the work is in every respect up to the standard of general excellence made possible by thoroughly systematized methods.

Heretofore the western provinces of Canada have been embodied in one edition, the Western Canada Gazetteer. But the last two years have witnessed such an almost incredible growth and development in these provinces, that it has become necessary to publish each separately, otherwise the combined work would be too ponderous and unwieldy for general use.

This volume contains a descriptive sketch of the cities, towns, villages, post offices, settlements, etc., in the Province of Alberta and Athabasca District, showing the exact geographical location of each, the railroads and watercourses upon which they are situated, or the nearest points, distance from well-known centres, the population, banks, churches, schools, telegraph, express and all matters of any importance.

In obtaining the population of the many places herein shown every possible effort has been exercised by the publishers to obtain full data. Many of the country post offices are at present so remote from railway lines that it was impossible, under the circumstances to visit them, and hence, a few do not indicate their full quota of inhabitants. In every case where it was possible to go or to have the names furnished by mail, the full population of town dwellers and the surrounding farmers, ranchers and homesteaders are recorded.

The use of the Gazetteer is becoming more general every year and its great importance as a business factor is now universally recognized. There is nothing more conducive to the development and extension of commerce than an easy means of communication such as a complete and reliable Gazetteer affords. It is an unexcelled medium for use in the sale and purchase of goods and every business and professional man is entitled to the opportunities it offers for the classification of his wares and for keeping his card where it may be found at all times by those who seek such information. It is of great value in extolling and advertising the resources of the country and a strong factor in inducing immigration.

The publishers desire to extend their thanks to the enterprising business men of Alberta whose patronage made possible the publication of this valuable work.

Very truly,

HENDERSON DIRECTORIES ALBERTA LIMITED

June, 1911.

Alberta

Alberta is a vast sloping plateau lying east of the Rocky Mountains and stretching northward from the International Boundary line to the 60th parallel of north latitude and eastward to longitude 110, the boundary line separating the Province from Saskatchewan. In the Canadian system of land surveys this line is called the fourth meridian. The area, therefore, is roughly speaking 800 miles by 300 miles; actually the province contains 253,540 square miles or 162,755,200 acres; of this 1,510,400 acres are under water, leaving 160,755,200 acres dry land.

Allowing the odd sixty million acres for the rough land of the eastern slope of the Rocky Mountains, other mountains and hills, together with other waste places that will not likely be suitable for cultivation, there still remains the large amount of one hundred million acres available for settlement. Of this amount about 1,582,000 acres were actually in crop during 1910. Thus a little over one per cent. of the arable land has been brought under the plow, a fact which suggests the best agricultural possibilities of the province.

The natural features of Alberta combine the beauties of prairie and mountain scenery. For three hundred miles open and wooded plains spread out in vast level reaches, and then climb over softly rounded mounds that grow higher and sharper till they break into jagged points and serrated ridges and at last rest upon the base of the Rocky Mountains. These rounded hills that join the mountains to the prairies are called the foothills. They are so distinctive and unique a feature of the country that Alberta is known as the Foothill Province. There are valleys so wide that their farther side melts into the sky and uplands so vast as to suggest the unbroken prairie. Nearer the mountains the valleys dip deep and ever deeper till they narrow into canyons through which mountain torrents pour their blue-gray waters from glaciers that lie glistening between the white peaks far away.

Here are the great ranges on which feed herds of cattle and horses and beside them the rich wheat fields that fatten the plains.

Few people have an adequate conception of the size of Alberta. To get such a conception one must understand that Canada is one of the largest countries in the world, having an area of 3,745,000 square miles, and practically the same size as the whole continent of Europe. Its provinces are not small duchies or kingdoms like those of many old-world countries. They are lusty young nations united in a strong federation, and abounding in all those natural resources that lie at the foundation of material development and progress. Alberta is one of the largest and richest of the provinces of Canada, and contains at the present time the largest and richest areas of

untouched agricultural land in America. Its climate is tempered by the chinook winds in the winter. The long sunny days and cool nights of the summer season are especially conducive to rapid and vigorous growth of many varieties of grain, grasses and vegetables. It is a new province with illimitable resources and opportunities. Since it was founded five years ago it has grown in wealth and population at an enormous rate, but its possibilities are so vast that the province has not yet passed the threshold of its wondrous and inevitable development.

Comparative Statement of Areas

Alberta	253,540 square miles
Great Britain and Ireland	121,391 square miles
France	207,054 square miles
Germany	208,780 square miles
Austria-Hungary	241,433 square miles
New England States (Main, New Hampshire, Vermont, Massachu- setts, Rhode Island, Connecticut, New York, New Jersey and Penn- sylvania)	165,745 square miles

Climate and Physical Features

The climate of Western Canada has been more or less misrepresented in the literature of the country and especially those writers who have never visited the West. The climate is one of the main attractions of the province. Contrasted with that of Ontario, or the Provinces and States along the Atlantic Coast, it is clearer, drier and less changeable. Bright sunshine modifies low temperatures to an extent that they are more clement and endurable than temperatures ten to fifteen degrees higher in places subject to winter rains and fogs. The sunlight is peculiarly bright and intense even in the short days of winter, a phenomenon that has justly won the appellation "Sunny Alberta."

The southern portion of the province has long been noted as a health resort. At Banff, west of Calgary, the hot water springs are famous throughout the world, and annually attract thousands of tourists, as well as numerous invalids for their curative qualities. Similar springs have been found west of Edmonton, where the Grand Trunk Pacific crosses the Rocky Mountains.

Northwestern Canada has too long been regarded as possessing a climate too vigorous for settlement or agriculture. It was formerly regarded merely as a fur-trading country. It is no more peculiarly the seat of the fur trade than was Ontario, Quebec or any other part of Canada or the United States. As a matter of fact, the fur trade of the Northwest has been driven into the regions beyond Alberta into the Mackenzie valley, and is as far removed from the capital of the province as the fur producing districts are from the capitals of the countries of northern Europe.

Since the Canadian Government purchased Rupert's Land from the Hudson's Bay Company, in 1870, the remotest districts of the Province have been explored by expert officials of the Geological

Survey, and patrolled by the Northwest Mounted Police. Ample data has been secured to prove that the climate of Alberta is as favorable to agriculture as any place in the world. Their conclusions have been substantiated by thousands of settlers who have come to the country.

There is one common flora extending from the International Boundary northward to Lake Athabasca and the Peace River, and as that flora requires a high summer temperature for its existence it indicates an even distribution of heat throughout the district during the summer months. This fact places the northern districts of Alberta, the prairies of the Peace River district, and the lands along the Athabasca in the same class as far as grain culture is concerned as those lands in the vicinity of Winnipeg, Regina or Calgary.

The production of cereal crops depends entirely upon summer temperatures, and summer conditions of climate.

The rainfall during the year is distributed so as best to promote vegetation in the growing season. The period of greatest rainfall embraces May, June, July and part of August. The latter half of August and September are dry and ideal harvest weather prevails.

The long hours of sunshine in the summer months promote steady and rapid growth and really secure a longer period of actual tissue building in the growing plants than is found in lower latitudes. From the first of June to the first of August there is but about two hours of darkness in the more northerly districts.

Chinooks

The average range of temperature and conditions of climate are materially modified by a peculiar phenomenon known as "Chinooks." These are warm winds that blow from the mountains and are caused by the condensation of the air and the compression of the moisture as the currents descend from the mountain tops liberating heat. It has been estimated that the air rises ten degrees centigrade for every 400 feet it descends.

The chinooks occur along the whole range of the Rockies from southern Alberta to the Peace River, though they are more characteristic of the south, where the name originated. They have been known to cause a rise in temperature of 60 degrees in a few hours.

Rainfall

The quantity of rain is not less important than the measure of heat for agriculture and the permanent occupation of any country. After the Bad Lands and the Coteau of the Missouri are passed the level of the prairies descend and the rainfall increases. Cactus and sage bush give place to the nutritious bunch grass of the Southern Alberta ranch lands, and as we proceed northward, to heavier and taller grass, and forest. No increase of temperature is observed, but only an increase in moisture, resulting in more equable temperatures, which accounts for the fact that the bison sought winter pasturage and shelter on the grassy stretches and woodland belts of the Peace and Athabasca Rivers.

The rainfall is copious and comes in greatest quantity during the growing season; when it is most needed, and ceases just when the harvest is due.

There are no rains or slushy weather in the winter season. In the southern portion of the province snow falls but does not stay. Horses, cattle and sheep graze out all winter. They scratch the dry snow off the grass and grow fat. In the northern portion the snow falls in depths varying from six to eighteen inches and remains from the beginning of December to the beginning of April. Spring opens at the same time along the immense line of plains from the Mackenzie to Montana.

Physical Features

Absolutely level plains form no great proportion of the surface of the province. It is mostly undulating country diversified by forests, lakes and streams. The whole province may be roughly divided into three great natural divisions—Southern Alberta, Central Alberta and Northern Alberta.

Southern Alberta is open rolling prairie trenched by deep river valleys. It extends north to the Red Deer River. Along its western side extend the Foothills. Here and there in the plains are found hills rising from 3,000 to 4,000 feet high.

Central Alberta occupies the famous valley of the Saskatchewan. It is park-like country with numerous lakes and streams. The timber, consisting of poplar, spruce and tamarac, grows in considerable quantities along the lakes and rivers and supplies a large amount of the building material necessary for the settler.

Northern Alberta is the region of great rivers, lakes and forests, besides vast tracts of open prairie like the famous Grande Prairie and the great open terraces of the Peace River valley.

Rivers

The Province of Alberta is the source of two of the four great river systems of the North American continent—the Saskatchewan and the Mackenzie. The Saskatchewan is divided into two great arteries, one of which, with its tributaries, the Bow, Belly, St. Mary, Waterton, Old Man and Red Deer, waters the south, while the north branch with its tributaries, the Brazeau, Clearwater, Sturgeon, Battle, Blindman and Vermilion, waters the great central plains.

The mightiest rivers are in the north. The Peace and the Athabasca are the two greatest arteries of the Mackenzie system which drains a territory of 1,000,000 square miles. The Peace drains 117,000 and the Athabasca 60,000 square miles of territory. The Hay River, beyond the watershed of the Peace, drains 26,000 square miles.

Natural Vegetation

The natural vegetation of Alberta is luxuriant and varied, and not a single species of plant life indicates arctic or boreal tendency.

Wild plums, choke cherries and June berries are abundant in the Peace River. Strawberries are abundant in the northern slopes and woodlands. Black currants, red currants and gooseberries grow in profusion. Raspberries spring up everywhere where the forest and shrubbery is destroyed by fire.

No natural feature of Alberta strikes the stranger with more agreeable surprise than the wonderful variety and luxuriance of the native grasses. Whether for pasturage or hay they are alike serviceable. There are scores of species which in many regions grow so tall and thick that the traveller finds difficulty in making his way.

Roughly classified, the wild fodder vegetation falls into three divisions, namely: The true grasses, the sedges and rushes and the legumes (peas and vetches). Ninety-six different varieties of grasses have been identified, of which forty-six varieties make excellent hay. Of the sedges and rushes there are at least ninety-four varieties, many of which make good hay and all make splendid pasture during the early spring and summer. The grasses naturally fall into groups as regards their habitats. The true grasses are found on the uplands mixed with wild pea vine and vetches. The great heat of August and September rapidly cures these plants on the ground or upon the trees to which the peas and vetches cling and converts them into nutrient winter pasture or hay. The sedges grow on the lower lands and in the marshes.

Climate and Agriculture

The value of climate in relation to agriculture is as important as the chemical nature of the soil. Good as the soil is it never would have won the supremacy in grain production were it not for the purity of the air, temperature and equilibrium in precipitation. The value of pure air to successful agriculture is almost as important as it is for the health of the population. It prevents the rapid decay and transformation of vegetable matter in the soil and also the too rapid transformation of inert or stored fertility, thus virtually precluding the waste of nature's capital.

The cold temperature of the summer nights is the cause of the large relative yields and unexpected quality of the grain. In the judgment of the best agriculturists the yield would be lessened proportionately to an increase in the temperature of the summer nights.

The relatively light precipitation is a further boon to the Alberta farmer. The rainfall throughout the province varies from fifteen to twenty inches, which with forty inches in the British Isles or thirty inches in Ontario, seems insufficient, but it is enough to grow good farm crops when intelligently tilled, and not too much to leach the soil. If the quantity of rain were distributed equally throughout every month in the year the comparatively light fall would be insufficient.

The uniform fertility of the soil of Alberta cannot be exaggerated. It consists of a marly clay subsoil varying from a few feet on the hills and ridges to great depths on the plains. Overlying this is the thick mantle of black or brown vegetable mould. The measure of its value is the amount of nitrogen, potash and phosphoric acid it contains, or in other words, its producing power. Like the whole of the prairie region of Western Canada the country has not been subjected to serious geological disturbances within recent time, and consequently the decay remains of the luxuriant vegetation of centuries is compounded in the soil.

Cereal Production

Alberta is the last great wheat belt of the American continent. The States of the Union that formerly produced wheat are now producing corn almost exclusively. Ohio, Indiana, Iowa and other States of the Middle West will always remain the corn belt of the continent, while the Provinces of the Canadian Northwest will surely remain the great wheat producers. The whole province lies south of the wheat line, which bends from the Mississippi northward to the valley of the Peace, reproducing during the period of vegetation the summer heats of New Jersey and Ohio.

The wheat areas of the world are becoming exhausted or utilized for other crops. Consumption of wheat is increasing at a greater rate than production and an era of high prices is in sight. This scarcity is Canada's opportunity, and she is quickly taking a leading place in the wheat producing nations of the world. The problem of our agriculture is the problem of supplying bread to the ever-increasing millions of America and Europe, and while marvellous strides have been made in the facilities for transportation of agricultural products, yet the real solution of the problem is bringing the population to the food rather than the food to the population. The vision that meets us here is one of ample land awaiting man and of possibilities of agricultural production which can be realized only by augmented immigration. Before and above all of what transport has done, and may yet do to carry agriculture across the sea, the more reasonable prospect is the settlement of these wide areas by a population resting on the soil which this great province offers.

The increase in wheat production in Alberta in the last few years is but an index of the great development that is bound to follow in the next decade. Below is given a statement showing the rapidity with which our wheat industry is advancing. The truth is that our wheat lands have been discovered, and nothing can stem or turn aside the stream of immigration that has set in from the United States and the Homeland. Those who come now may get cheap or free lands according to their means and choice of location, and will soon be in a position to take advantage of the era of prosperity that seems assured for the next few years. The land is going quickly, but there are millions of acres still left as productive and fit for settlement as any already taken, and which will soon be reached by railways.

Alberta has christened a new and superior grade of wheat with her own name, "Alberta Red." It is a winter wheat and has so many distinctive and excellent milling qualities that a new name was necessary to describe it.

It can be grown in any part of the province, and by this means the farmer is able to divide his work into two seasons—a part of his farm being sown to fall wheat, and the other to spring wheat the following season. It can be sown at any season of the year and pastured until the fall and will yield a splendid crop the next year. As soon as the crop is cut the stubble may be sown and disced for the succeeding crop without plowing. Cases are frequent where three crops have been cut from one sowing, the second and third being volunteer crops. In 1907, a field of 900 acres near Lethbridge averaged 17 bushels and graded No. 1 northern, and it was only a volunteer crop which cost nothing to put into the ground.

Winter Wheat

Winter wheat has been successfully grown in the province in a small way for eighteen or twenty years, but it was not until comparatively recent years that any extensive area was sown to it. With the introduction of "Alberta Red," a new area for winter wheat came in, and now the land cannot be broken fast enough. The acreage sown to winter wheat has more than doubled each year for a number of years. So far there has been practically no winter killing where the grain was properly put in. Turkey Red wheat from Kansas has been introduced and grows such a superior sample here that it was rechristened "Alberta Red." It is now shipped back to Kansas for seed.

Winter wheat has been successfully grown at Edmonton and at Fort Vermilion, fully four hundred miles northwest of Edmonton. The wheat is in great demand on the English market on account of its superior mixing qualities. In the southern portion of the province there has never been a failure where winter wheat was put in properly prepared land. Each year sees winter wheat grown with increasing confidence over an ever-widening area.

Spring Wheat

What has been said of the suitability of the province for winter wheat is equally true regarding spring wheat. The yields have been uniformly good, and when compared with those obtained in the neighboring States to the south of the International boundary line have been uniformly high. An average of 20.62 bushels per acre over ten consecutive seasons is no mean average for the whole of the Province. When Alberta is compared with the spring wheat States of the Union and where irrigation is not employed it will be seen that the yields are much larger and that it is better adapted for wheat culture.

The following table gives the yields for one year (1908) and for a period of ten years (1896-1905) of some of the most important spring wheat States across the line, and compares them with the yields obtained in Alberta for similar periods:

	Yield for 1908.	Average Yield for 1896-1905.
Dakota, W	11.6	12.2
Dakota, S	12.8	11.1
Iowa	15.5	14.1
Kansas	5.5	13.7
Minnesota	1.8	13.3
Nebraska	13.0	15.4
Washington	15.0	17.6
Wisconsin	17.5	15.7
	1909.	1900-1909.
Alberta	18.97	20.62

Alfalfa, Clovers and Timothy

The experience of Kansas is apparently being repeated in Alberta. The wheat lands of Alberta have attracted thousands of American farmers and have made them rich. The wheat barons have flourished beside the cattle kings. The attraction of wheat has been the real colonizing factor and the production of it has done the pioneer work in soil cultivation that was necessary to lay the basis of permanent and successful agriculture. It has given the land tilth, permitting the successful growing of other crops such as sugar beets, roots and fodder crops. But when the wheat farm is done growing wheat the farmer knows that its fertility must be maintained and that alfalfa is the crop that feeds the soil and produces a large return of hay as well. The profusion with which the wild vetch and pea grow in all parts of the province proves at once the adaptability of the land to the production of this crop. It is not with the wheat grower alone that alfalfa is growing in favor. The rancher sees his range restricted and must do something to provide pasturage and fodder for his herds. The best crop for his purpose has proved to be alfalfa.

The growing of alfalfa promises to be the great crop of the future, especially in the southern part of this province. It is particularly fitted for cultivation under irrigation and does excellently on non-irrigated lands as the results of the experiments carried on at the Dominion Experimental Farms at Lethbridge and Lacombe last year prove, where an average of three tons of cured hay has been obtained.

The time is close at hand when most of the live stock produced in Alberta, and now marketed in a more or less unfinished condition, will be sent to the rich alfalfa meadows east of Calgary, there to be put into prime shape before being exported or slaughtered. A home market at highly remunerative prices will thus be made available for all the fodder that can be produced on irrigated lands, with the additional advantage of having the feed consumed on the irrigated farm and ultimately returned to the soil that grew it, thus maintaining its fertility.

The certainty of the irrigated lands of this district producing alfalfa as a leading crop opens up a vista of possibilities in many directions. During the early years of settlement in this Province, the claim was made that Alberta possessed all the natural conditions to make it one of the leading live stock countries in the world. When farmers invaded the ranchers' domain later on, and numerous crops of winter wheat and other coarse grains were raised year after year, Alberta's fame as the foremost stock country faded, and the world henceforth knew it only as a great crop-producing district. The advent of alfalfa will again bring the live stock industry to the front in Southern Alberta; history thus repeating itself.

There is an enormous area of country lying west of Calgary that will always be devoted to the raising of live stock, namely, the foothills. Owing to the difficulty of grain raising there, it is reasonable to suppose that the mature steers will be brought to the central market at Calgary and Lethbridge and shipped out again to the alfalfa meadows of the irrigation belts to be finished prior to export.

Live Stock

Many conditions favorable to the live stock industry are peculiar to Alberta. First, there is abundance of grass for pasturage and hay. The grasses are highly nutritive and excellent beef-producers, while the wild clovers, vetches and peas are unexcelled for the production of milk.

Second, the climate is dry in the cold season, and cattle, horses, sheep and pigs can be wintered without the cost of stabling. An open shed, the shelter of a clump of trees or a straw stack is sufficient for the hardest winter. To those living in wet winter climates such favorable conditions are almost incredible, but in Alberta it is found that the more stock are reared in the open air the stronger and harder is the type produced.

Third, the fodder straws—wheat, oats and barley—have a higher food value here than in any other part of the world.

The range breeders are organized into two associations; one is called the Western Stock Growers' Association with headquarters at Macleod, and the other, the Central Alberta Stock Growers' Association, with headquarters at Stettler. The membership of both consists principally of growers of beef cattle. The former consists of the big ranchers whose ranges are south of the main line of the Canadian Pacific Railway. They usually run herds of from 500 to 25,000 cattle. These men are beginning to feel the encroachment of the rapid agricultural development in the vicinity of their ranges and are asking the Government for a more certain tenure of their grazing leases.

The Central Alberta Stock Growers' Association is comprised of the smaller ranchers operating between the Battle and the Red Deer rivers. They usually own herds of from 50 to 2,000 cattle. Some of them operate on leased land, but the majority run their herds on occupied lands.

Winter fattening among the farmers for the spring market is growing and proving a profitable undertaking. With increasing population there is a greater demand for beef for home consumption, and to meet this demand a number of abattoirs have been established in the province, the largest of which are those of P. Burns & Co., Calgary; and the Canadian Swift Co., Edmonton.

The interests of the live stock men generally are under the supervision of a Government official, the Live Stock Commissioner for Alberta. He pays particular attention to stock inspection and shipping facilities of the railways.

Poultry and Dairying

There is a large field in Alberta for the industrious poultry raiser. A few hundred chickens will yield a good income. No less than \$400,000 worth of poultry and eggs were imported into one Alberta city by jobbers alone during 1909 for distribution at Alberta and British Columbia points. The climate is ideal for poultry raising and the markets are the best in Canada. Turkey raising is becoming an industry of importance. Thousands of these birds are grown and fattened for the market in the coast cities, and thousands of dollars are brought into the country every year through this business alone. Where large areas of wheat stubble may be utilized for forage ground, the expense of putting turkeys on the market is very small indeed.

For many years the cattlemen of Alberta devoted their attention almost exclusively to the beef breeds, but of late years farmers are introducing dairy herds of Ayrshires, Jerseys, Holsteins and Guernseys. All the necessities and circumstances necessary to the success of dairying are present in the Province of Alberta. Abundance of nutrient grass, wild vetches and peas in summer, hay and grain in winter, pure water and a healthful climate constitute the natural adaptability of the country for dairying. These, combined with the advantages of a growing home market in British Columbia, are the conditions which make this industry one of the safest and most remunerative the farmer may follow in this province. Within the last five years the dairy industry has become firmly established especially in Central and Northern Alberta, and the output of the creameries and home dairies is increasing year by year. Natural advantages, technical education along the best scientific methods under government supervision is bound to make Alberta as famous in the production of butter as Denmark and Wisconsin.

A few years ago the dairymen of the province became dissatisfied with the private creameries which were then in operation and asked the government to institute some system of governmental control and management. Eventually a chain of government co-operative creameries were established. Last year there were 24 government creameries in operation. These institutions are under the control of the patrons who constitute a co-operative creamery association. A board of directors looks after the interest of the patrons while the government undertakes the manufacture and sale of the butter. For this purpose the Provincial Government maintains at Calgary the largest and most important dairy station in Western Canada. At the end of every month each patron is credited with the butter-equivalent of his cream and is advanced 20 cents per pound. When the total output of the season has been disposed of by the government the patrons receive the balance due for the summer's product of butter. An officer of the government, the Dairy Commissioner for Alberta, has charge of the manufactures, storage and sale. By means of the cold storage facilities at Calgary the government is in a position to await a favorable turn of the market and realize the maximum for the patrons of the creamery association. The government charges merely the cost of manufacture and sale. The result of this policy of co-operation has been the building up of an extensive export business in winter and advertising the province as a splendid butter country, a condition that benefits the home dairies and private creameries.

Irrigation

A considerable area of Southern Alberta is subject in some years to drouth. In order to insure against the absence of the necessary rainfall irrigation is resorted to and has most satisfactory results. The tendency has been to acquire the easily irrigable lands in the valleys either by homestead entry or by the purchase under the irrigation laws, or by both means, and to secure water rights from the nearest stream. The result has been that the equally productive bench lands have remained undeveloped owing to the higher cost of bringing water to them. Usually each farmer owns his own system of ditches but gradually the farmers are beginning to realize that better results can be obtained by co-operation in building larger ditches following a higher level from which laterals may be run out to the lands of each co-owner. By this means a larger acreage is coming under cultivation and the proportionate cost is less than by independent systems.

The quantity of irrigable lands which may be used by independent farmers is small compared with the large areas that can be irrigated only by comprehensive engineering schemes. Consequently the government has adopted the policy of disposing of large tracts of land to companies subject to agreements to construct works for irrigation of not less than fifty per cent. of the area sold and to supply water to the settlers on terms satisfactory to the government or in specified agreements.

The largest of these companies is the Canadian Pacific Railway. This company has undertaken the construction of the largest irrigation system in America. About one-third of the system has been finished and the lands placed on the market at satisfactory and very attractive terms. The tract covers over 3,000,000 acres extending from the City of Calgary in a strip forty miles wide in the Bow River Valley for 150 miles. Settlers are flocking to this region. The company provides ready-made farms for settlers and maintains demonstration farms for their instruction. Through the administration department of the Canadian Pacific Railway the company breaks, seeds and fences the land for the buyer in advance of his settling upon it, and in many other ways promotes the welfare of the new settler.

The Southern Alberta Land Company has been given permission to purchase 380,000 acres of these lands between the Bow and Belly Rivers and the right to divert 2,000 cubic feet of water per second from the Bow River at high and flood stages which is stored in Lake Macgregor for the season's requirements. The quantity of water is sufficient to irrigate at least 300,000 acres of the company's grant.

The Alberta Railway and Irrigation Company is the pioneer of irrigation in Western Canada. Their land lies along the St. Mary, Belly and Milk Rivers, and from which the water is obtained. In 1902 they were given the right to purchase 500,000 acres in addition to their railway grant land.

Lands are sold at \$5 per acre without water rights and \$30 with such rights plus an annual charge of \$1 per acre.

A very profitable beet sugar industry has developed in this district. Over 400,000 tons of beets are consumed annually at the sugar factory at Raymond. The lands of this company like those of the Canadian Pacific Railway are developing rapidly. Through the agency of irrigation these portions of the province are becoming closely settled mixed farm districts and rapidly increasing in wealth and public improvements.

Another tract of 9,000 acres has been sold to the Aylwin Syndicate, comprising townships 14, 15, 16, range 17, and township 14, range 16, west Fourth Meridian, subject to the construction of works that will irrigate at least quarter of this area.

Water and Fuel

The water supply is ample for all the needs of settlement. There are numerous rivers, and innumerable creeks and lakes. Thousands of beautiful crystal streams rise in the foothills on the west side of the province and thread their course eastward over the plains to join the larger rivers. In the higher regions these streams generally teem with mountain trout. Otherwise, water is found here as it is in any other country by boring or digging for it. Invariably the water found in Alberta wells is sweet and wholesome. There are no poisonous springs, and horses and cattle have roamed the plains in the early days from one end of the year to the other and have never been known to suffer from a water famine. The concerted opinion of surveyors, travellers and ranchmen is testimony to the fact that not a spring or lake has been found in the province where horses or cattle refuse to drink. Wells sunk to a moderate depth anywhere in the drift which covers the whole country will contain good, sweet water. Deep wells which penetrate the underlying clay sometimes yield mineral waters which are not so good for general use.

There can never be a fuel famine in Alberta as long as there are miners left to dig coal out of the earth and cars to haul it to the consumers. In hundreds of places it is not necessary to go far down. It can be dug out of the river banks. Almost every river in the province cuts through seams of coal. Alberta is one of the greatest store-houses of coal in the world. Coal beds extend from the plains to the mountains and comprise many grades, varying from lignite, bituminous to the best anthracite varieties.

The Province of Alberta is liberally supplied with coal areas.

East of the Foothill area lies a great extent of coal-bearing rocks which are comparatively undisturbed. The coal in this region is well suited for domestic use; and as it is within the settlement belt, where wood is scarce, a demand for it is assured. They extend north from near the International boundary to near the Peace River, covering an area of at least 10,000 square miles.

Another coal formation occupies the southeastern border of the province with an area of 5,000 square miles; the seams in this are of more value in the southern portion than farther north or east. The principal mines in this area are to be found near Lethbridge.

Below is given an estimate prepared by the Geological Survey of Canada of the coal areas in Alberta and their estimated contents. It indicates that the known stores of coal may supply the province, the whole of the prairie region and the western states with coal for many centuries.

Estimate of Total Content
Billions of Tons

Kind of Coal.		Square Miles.		Million Tons.	
Bituminou	Coleman area	45		2,000	
	Blairmore-Frank	50		1,500	
	Livingstone	60		1,500	
	Moose Mountain	15		250	
Bituminous and Anthracite	Cascade	40		1,200	
	Cascade			400	
Anthracite	Palliser	6		20	
	Costigan	12		60	
Bituminou	Bighorn	60		1,400	
	Belly River area	3,500		10,000	
Lignitic and Lignite	Foothills	2,000		11,000	
	Edmonton formation	10,800		60,000	
Coal and Lignite		16,588		89,330	
Lignite					

In some parts of Alberta almost every rancher or farmer owns a coal mine, and in very few places are the farmers forced to haul coal long distances. The projection of the Grand Trunk Pacific and Canadian Pacific Railways into the country west of Edmonton has encouraged prospecting in that region with the result that several mines of good steam coal have been discovered and opened up.

The Dominion Government has provided for a cheap supply of coal for the settlers. By a clause in the Dominion Lands Act, all coal leases contain a provision whereby settlers may obtain their coal at the mine for \$1.75 per ton.

Timber

In addition to coal there is a good supply of wood in many parts of the province, which is taken advantage of in many ways by the farmers and settlers. The eastern slopes of the Rocky Mountains are well covered with timber of sufficient size for commercial purposes. This timber follows the streams and valleys out from the mountains. In the park country, which covers the most of the central and northern portions of the province, considerable timber is found fit for commercial purposes; and numerous sawmills exist, principally on the streams and rivers. The logs are floated down these streams from the timber limits and are held in booms at the various mills. The lumber from these mills, together with the product of the British Columbia mills, which can be obtained at well stocked yards in every town, puts lumber within easy reach of every settler. Trees of the following varieties are found: Poplar, aspen, birch, elm, cottonwood, willow, maple, ash, spruce and pine.

The homesteader is allowed to cut a certain amount of lumber from Government lands for building purposes. Spruce, poplar, birch, pine and fir are the different woods cut for commercial purposes. In the park country there is ample timber, of sufficient size for the construction of log buildings, and in many districts miles and miles of rail fencing are to be found. There is also an abundance of wood for fuel in the same districts. These conditions make it very easy for the homesteader to get started. On the open prairie trees grow very readily and the Dominion Government have established a large nursery for the propagation of trees, which are given to settlers free provided they comply with certain conditions regarding cultivating and caring for them. In this way wind-breaks around farm buildings are springing up rapidly and it will not be long before the open prairie will be converted into a park country. Once the trees become established and fires are prevented from touching them, the growth is simply wonderful.

Schools

The province has an excellent system of education, and liberal aid is given by the state towards securing the highest advantages in keeping up the standards of work and the professional qualification of teachers. School districts are established by the government on application of the ratepayers as soon as there are eight children in a school section. The work in the public schools is divided into eight standards. The three upper standards are devoted to the work ordinarily carried on in the High Schools of the eastern provinces of Canada and the same as carried on in the upper standards of the state schools of the United States.

School districts are organized by the government, but are controlled and maintained by the ratepayers. In addition to the local rates levied by each district the government grants aid based upon school attendance, number of days school is kept open in the year, the grade of teacher employed and upon the character of the work as reported upon by the state school inspector. The government grants to the public schools constitute 66 per cent. of their maintenance. In this respect Alberta leads the Dominion. In 1909 these grants were \$5.70 per head of the school population compared with \$2.00 the average of the two best provinces of Eastern Canada.

Since the province was organized five years ago a wonderful expansion in educational work has taken place. Eight hundred and fifty new school districts have been established, while the school population has increased from 24,000 to 45,000. There has been a great increase in the number of centres at which students are prepared for higher educational work in the upper standards and in the university. In 1906 there were only six state school inspectors compared with thirteen at the present time.

Three years ago the Provincial Normal School was opened at Calgary for the training of Alberta teachers. The staff comprises five experts with a model practice school department and in equipment and architectural beauty is the finest teachers' training institution in Canada. No province in the Dominion has better teachers. It draws the best teachers from the older provinces of Canada, and has the highest percentage of first class certificated teachers and university graduates in the profession of any province in Canada.

The University of Alberta opened its doors in October, 1908, and since that time has made rapid and satisfactory growth. All present there are 140 students proceeding to degrees in Arts and Applied Science. It has a staff of twelve professors and a splendid building is in course of erection on the campus which in points of architectural excellence and utility will equal those of the oldest and richest universities on the continent.

Roads and Bridges

Good roads are indispensable to the progress of agriculture. Every settler and farmer is intensely interested in good roads which raises the value and increases the profit of everything he produces. Since the province was organized five years ago the government has spent the largest sums of public money upon roads and bridges, and have vastly improved the means of local transportation. During that time nearly \$8,000,000 have been appropriated in public improvements. During the last four years 1,600 bridges have been built and repaired.

Telephones

Alberta was the first province in Canada to own and operate its own telephone system. When the province was organized in 1905 the telephones were controlled by a private corporation. The rates were high and the service unsatisfactory. As soon as it was practicable the new government began to build its own trunk lines, rural lines for farmers and town exchanges. This action was such a blow to monopoly of the private corporation that the government was finally able to purchase the corporation lines at a reasonable price, and now the province owns and operates its own telephones at cost and in the interests of the people. At the present time the province owns and operates 3,500 miles of long distance line, and about 2,500 miles of rural or farmers' lines. There are over 1,600 subscribers in the province, 3,000 of whom are farmers.

Demonstration Farms

At the last session of the legislature the government decided upon the establishment of six demonstration farms to be located at various parts of the province for the purpose of demonstrating agricultural possibilities and of ascertaining the specific methods of crop culture and soil tillage suitable to the respective districts where the farms are to be situated. It is a system of practical education that will reach the farmers directly and afford them the object lesson of having difficulties solved for them for which they have neither the time, experience nor money. These farms are to be moderate but up to date in equipment, and will be such that any energetic and well-to-do farmer may emulate.

Short courses in agriculture comprising lectures and demonstrations in the subjects of grain, soil, weeds, poultry, dairying, breeding and feeding of live stock are held annually during the winter season at different points throughout the province. The session lasts from one to two weeks and is attended by large numbers of farmers, who thus have the benefits of technical education brought to their doors.

Railways

Three transcontinental lines traverse the province from east to west. There are in reality five transcontinentals in the province. The Grand Trunk Pacific, the Canadian Northern and the Canadian Pacific Railways have lines that cross the province, converging at Edmonton, the provincial capital, and spreading out over the rich country west before they meet again at the Yellow Head Pass in the Rocky Mountains on their way to the Pacific Coast. The main line of the Canadian Pacific Railway passes some distance south of the middle line of the province through Calgary and reaches the Pacific Ocean by the Kicking Horse Pass. In the extreme south another line of the Canadian Pacific Railway passes some distance south of the coast by the Crow's Nest Pass. In addition to these main arteries of commerce numerous branch lines have been built and many more are under construction.

Recognizing the vital importance of railways in promoting development, the provincial government is carrying out an energetic and forward policy regarding railways. In a short time the remotest town and the most isolated homesteader will be certain of railway transportation and a market. The policy of the government in the question of railways and roads is that the system shall be so developed that the remotest farmer may travel to market and back home the same day. During the session of 1909 the government guaranteed the branch lines of the Grand Trunk Pacific and Canadian Northern Railway Companies to the extent of \$20,000,000. A considerable amount of the work guaranteed has been constructed up to the present time and nearly all has been commenced. The Canadian Pacific Railway, although it has no provincial guarantee, is extending branch lines and trunk lines in every part of the province, particularly in Central and Southern Alberta.

Hudson's Bay Railway

The Federal government is keenly interested in the transportation problem of Alberta, and is committed to the construction of a railway line from the Alberta systems to the Hudson's Bay. This project provides a new and shorter freight route to the European markets, and, according to a statement made in the House of Commons by the Minister of Railways, will save five cents per bushel on all wheat shipped by this line. The appropriations for the construction of the road have been voted by the Dominion Parliament.

At present most of the grain grown in Alberta goes east by way of Winnipeg and the Great Lakes ports. The Canadian Pacific Railway are now giving a rate to Vancouver, which makes it possible to ship wheat and other grain from the Pacific Coast via Cape Horn or the Isthmus of Panama by train to the Old Country markets. Several shipments have been made this way and are believed to be but the forerunners of an extensive grain trade. Large mills are in operation at Calgary and Edmonton for grading wheat.

Alberta is an agricultural country and, though its future history will witness a wonderful development in those industries dependent upon extensive mineral resources, the calling of the farmer embracing grain culture and live stock breeding will never fail in a land that possesses the soil and climate of the Foothill Province of the West.

The importance of Alberta to Canada lies in the fact that it has land in limitless quantity for the settlers from every part of the Empire and the United States. Railway development in Alberta will open more agricultural land than is possible in any part of America. The trek of the American farmer after the golden sheaf has begun and will continue until all the homestead and cheap land is taken up.

Agriculture today is witnessing a great revival. The new farmer has come with his crop-breeding, soil chemistry, applied physics and economics. As the nineteenth century was the century of the factory, so shall the twentieth be the century of the farm. Land will attain a fixed value to the extent that its attractions shall overcome the tendency towards city life. Nowhere will the new agriculture be attended with more fruitful results than in the new province of Alberta.

Province of Alberta

Capital: Edmonton

Autonomy granted 1st September, 1905

Total land area, 253,540 square miles (7% of Canada)

BANFF

A town on the main line of the C P R, 81 miles west of Calgary, 919 miles west of Winnipeg and 516 miles east of Vancouver. It is a medicinal watering place and pleasure resort, the altitude being 4,500 feet at the C P R station. The Government meteorological station on summit of Sulphur Mountain is at the altitude of 7,455 feet.

The town is headquarters for the "Rocky Mountains Park" the Canadian National Park, covering an area of 5,300 square miles or over 3½ million acres. It extends from near Morley on the east to near Palliser (B C) on the west, there being 103 miles of the main line of the C P within the park, which embraces parts of the valley of the Bowspray and Cascade rivers, Yoho Valley, Devil's Lake and several grand mountain ranges. The government appropriation is \$40,000 annually for improvements, of which there are now 75 miles of roads and bridle paths. The park revenue for the year 1905 was \$12,000, so that the park is more than self-supporting, other than new road work. The government has provided excellent accommodation for bathing at the Cave and Basin, also at the hot springs. Telephone service is furnished by the government local exchange, also line to Bankhead. Electric light from Bankhead Mines plant.

The hotel accommodation at Banff is first class, with prices to suit all classes. The C P R hotels at Laggan and Field are also included in the park since the extension of its boundaries

Population, 1909—700
Postmaster—Arthur N Saddington

The Sanitarium Hotel

The unparalleled beauty of the scenery, the salubrity of the climate, and the numerous means of enjoyment available, render Banff the most charming and bracing health resort in America.

**"OPEN
ALL
THE
YEAR"**

THE SANITARIUM, which is beautifully situated overlooking the Bow River and its lovely and romantic valley, is elegantly fitted with every appointment calculated to bring pleasure and comfort to the tourist or invalid.

**SIXTY ROOMS WITH BATH CONNECTED
ROOMS EN SUITE HOT AND COLD WATER**

A Livery is connected with the Hotel and first-class service is guaranteed by the management.

A fully equipped, modern, Private Hospital, under the direct supervision of DR. R. G. BRETT, is located within two minutes walk of the Hotel. In connection with the Hospital is a Bath House supplied with Sulphur Water from the celebrated Hot Springs, whose wonderful curative properties have made them justly famous.

Grand View Villa

DIRECTLY CONNECTED WITH THE FAMOUS BANFF
HOT SPRINGS

THIS comfortable little Villa is situated on Sulphur Mountain, 5,400 feet above sea level, overlooking the Bow and Spray Rivers and the Village of Banff.

It furnishes accommodation for about forty guests.

The views from its balconies are most enchanting, and pronounced by many tourists the finest in the world.

The Baths are given with water direct from the Hot Sulphur Springs, which have become famous for their wonderful curative properties in Rheumatism, Gout, Skin Diseases, Impurities of the Blood, Sciatica and all forms of Neuralgia, Stomach, Kidney and Liver affections.

Rates: \$2.50 to \$4.00 PER DAY

BLACKFOOT INDIAN RESERVE

This reserve is situated at Blackfoot Crossing on both sides of the Bow River. It extends from Rg 19 westward to Rg 25, and from Tp 20 north to the main line of the C. P. R. It comprises 479 square miles, containing 360,800 acres. Crowfoot Creek flows southeasterly into Bow River about 11 miles east of Blackfoot Crossing. The Arrow Wood Creeks run northeasterly through the southwestern part and fall into the Bow River. The chief topographical features of the reserve are low ranges of sand dunes called respectively Drifting Sand Hills, Persian Sand Hills, Nimex and Rocky Buttes. The country generally is a high undulating plain of fertile clay loam, with groves of cottonwood in the river bottoms. There are extensive coal areas on the eastern side of the Reserve, lying chiefly in the Bow River coal district. The number of families is 497. Gleichen on the main line of the C. P. R. is the nearest railway station and postoffice. The government officials are:

C. Gooderham agent
D. L. Breerton farmer
A. E. Jones farmer
Peter Rasmus interpreter
Billy Mayfield interpreter

BLACKIE

BLOOD INDIAN RESERVE

The largest reserve in the Dominion, situated between the Belly and St Mary's Rivers, 13 miles east of Macleod and 41 miles north of the international boundary. It comprises approximately 517½ square miles, containing 315,000 acres of land, which consists of high dry undulating plain interspersed with superior grazing coulees. The chief topographical feature of the reserve is Belly Butte, a well known landmark facing the Belly River. The principal Indian settlement is here. Turnip Hill is on the northern part of the reserve on the trail from Whoopup to Slideout. Fishing Creek enters the reserve near the southwest corner and empties into the Belly River. Lee's Creek enters near the southeast corner and empties into the St Mary's River. The two large valleys in the reserve are called respectively, Buffalo Coulee and Prairie Blood or St Mary's Coulee. The reserve has very little timber but very extensive coal areas. The number of families is 546. The government officials are

BRADSTREET'S

Capital and Surplus \$1,500,000.00

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information no effort is spared and no reasonable expense considered too great that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices.

The One Indispensable Medium

The Herald

DAILY CALGARY, CANADA

WEEKLY

WESTERN CANADA presents the best paying market in America in proportion to population. No advertiser on the American continent can afford to overlook it.

The leading Province of Western Canada is Alberta, with a population increasing at the rate of 50,000 per year. The leading city of Alberta is *Calgary*, with a population of *50,000 people*.

The Herald is the largest paper in Alberta, and has a sworn circulation of 11,500 copies daily.

With the Herald you can cover a field containing 400,000 people, the best buyers per capita in America. The time to reach the Alberta buyer is now. The cream of the trade goes to the first in the field.

The circulation of the Herald is 11,500 copies per day, sworn to, a greater sworn circulation than any other paper between Winnipeg and Vancouver even claims for its total circulation.

Any responsible advertising agency in Canada or the United States will quote you rates, or write us direct and we will give you every possible information as to this field.

City of Calgary

Incorporation.

Calgary, the largest and most important city on the main line of the C. P. Ry. between Winnipeg and Vancouver, situate at the confluence of the Bow and Elbow Rivers, and surrounded with the best grain producing and cattle raising country in Canada, 840 miles west of Winnipeg and 645 miles east of Vancouver, is the commercial centre of Alberta, with a population approaching 55,000, and the chief wholesale distributing point of the Greater West. Most of the leading Eastern manufacturers and wholesale houses are represented.

Incorporated as a town in 1882, while in 1894 it received its city charter.

Railways.

Calgary is the railway centre of Alberta. The C. P. R. employ over a thousand hands in Calgary and district, its pay roll amounting to \$3,600,000 a year. The Edmonton branch and the Macleod branch of the C.P.R., respectively, run north and south from here. In addition, both the G. T. P. and the C. N. R. Companies will be running an entire connected service into Calgary with their main lines by the spring of 1912. This is expected to find employment for an additional 700 men.

Calgary is the divisional headquarters for the western division of

the C. P. R., and has the most important shops on the line between Winnipeg and the coast, in which they employ a large number of skilled mechanics and helpers.

Industries and Power.

The principal sources from which the city has received its expansion pected to equal, both in extent and result from the development by irrigation of the rich grain producing areas and the working of the coal mines, which latter, are fully equal quality of coal mined, any other on the continent.

East Calgary is the seat of the milling industry, but it also holds plants manufacturing Portland cement, soap and lumber, while there are located here, iron foundries, packing plants, leather works, soap and other works. In addition to these, the discovery of natural gas within the vicinity of Calgary has given impetus to the encouragement of numerous industries, and that valuable asset now supplies power to a brewing plant and for lighting purposes. Too much importance cannot be accredited to this discovery, and its value is now engaging the attention of the City Fathers. Cheaper power will, it is expected, be given manufacturers by this source, about the years 1912-1913, when the gas will have been piped into Calgary.

The City's factories, generally, include a Soap Works, Candy Factories, a Box Factory, Iron Works, Breweries, Cigar Factories, Packing Plants, a Breakfast-food Factory, Cement Works, Harness and Saddlery Fac-

Calgary

ories, Brick Works, Flour Mills, a Coffee and Spice Factory, Tann and Mattress Factories, a Bedding Factory, a Macaroni Factory, Cold Storage Plants, Electric Light and Power Plants, a Gas Plant, Lumber Mills and several Planing, Sash and Door Factories (one of the largest planing mills on the continent), three daily, two weekly and three monthly newspapers.

Buildings and Streets.

The Business Blocks of Calgary are of substantial construction, the most imposing being built of stone quarried from the district. The Streets and Business Houses are lit by electricity, from the Municipal Electric Light Plant, which also supplies domestic light and power.

The climate is ideal and on account of its altitude (3,389 feet above sea level), Calgary has long been favorably noted for its beneficent attributes.

Educational.

Calgary's educational advantages are of import, and its modern equipped School Buildings furnish every requirement to make them perfect. The Public School buildings of the city are exceptionally attractive. There are also a number of private Schools, including the Western Canada College, St. Hilda's Ladies' College, and the Sacred Heart (R. C.) Convent.

Parks.

The City is well provided with Parks, the Victoria Park, comprising about 20 acres, having a good race track, and various buildings used for Cattle Shows and Exhibitions. The Island Park in the Elbow River is a very picturesque spot and is greatly enjoyed by the citizens.

Calgary is the headquarters for the Territorial Live Stock Associations and the Cattle Breeders' Association hold an annual sale here of pure-bred stock. The Horse Breed-

ers' Association also have an annual stallion and horse show.

Of great import to the neighborhood is the Government Creamery and Cold Storage situate a short distance east of Calgary, which demonstrates to the public the manifold advantages of mixed farming and dairying.

Further significance on this last mentioned point is lent by the C. P. R., whose irrigation policy has revolutionized Southern Alberta, and upon which \$17,000,000 has been partially expended.

CIVIC OFFICIALS.

City Offices and Council Chamber:
2nd St. E. and 7th Ave. E.

Mayor—John W. Mitchell.

Commissioners—Arthur G. Graves and
Simon J. Clarke.

The Marvellous Rush of Settlers

To Alberta is taxing the facilities of the Railways to their utmost. What has attracted the outside world to this Province is the known fact of its fruitful soil. Streams of wealthy settlers are pouring in and rapidly becoming owners of the finest lands in the Continent for **GRAIN RAISING** or **CATTLE REARING**.

BOTH ARE MONEY MAKERS

The opportunity is **NOW** to acquire riches, and such a golden chance comes once in a lifetime. So get busy and purchase some of these **CHOICE FARM LANDS**.

For Sale Large Tracts of Land

Suitable for Colonization Purposes

Also

Improved and Unimproved Farm Lands

From \$12.00 an acre up

For full information write the

CANADIAN-AMERICAN LAND
COMPANY

134 NINTH AVE. W. P. O. BOX 649 CALGARY

What Has Made Southern Alberta ?

IRRIGATION !!!

The natural resources of the Province have become dominated with the scientific method of farming incepted through the engineering process known as irrigation. So successful have the efforts been of those entering upon these lands that demands from others are keeping the great Irrigation Companies in constant motion to keep pace with them.

Many splendid opportunities are now available to acquire some of these

CHOICE IRRIGABLE LANDS

Large crops have resulted through irrigation and the extremely fertile nature of the soil, and the best of America's farmers are participating in the profits of their labor.

SPEEDY REQUEST

Is needed to secure some of this land. All letters of enquiry will be quickly replied to by THE AGENTS, the

**CANADIAN-AMERICAN LAND
COMPANY
134 NINTH AVE. W. P O BOX 649 CALGARY**

COAL

Is generally to be found in the Province of Alberta at depths varying from eighty to three hundred feet below the surface, although in not a few instances it has been located out-cropping along river banks. Mining the vein is practically in its initial stage, but during the last five years rush to the West the attention of Colliery Proprietors has been drawn to the question "who will supply the settlers with fuel?" The output of the mines working has been taxed severely by the cities, while the increasing number of smaller towns have had to make shift with a scanty supply. Consequently coal has been retailed at TOP PRICES to the benefit of the Mine Proprietors.

FUEL IS AS NECESSARY AS FOOD

NO SOUNDER PROPOSITION

Is before the Speculator and Capitalist at the present time than the immediate development of **ALBERTA'S IMMENSE COAL-FIELDS**. Large dividends await those opening up these reserves, the mainstay of this proposition being no less than the remarkable peopling of Western Canada now taking place.

STRICT ENQUIRY

Is invited into a few select propositions placed in our hands for development, and correspondence solicited by the

CANADIAN-AMERICAN LAND
COMPANY

134 NINTH AVE. W. P.O. BOX 649 CALGARY

Immense Building Operations

Have helped to deplete the forests of Canada to a considerable extent, but the immense timber areas of the Dominion appear at first sight sufficient to meet the needs of the markets. This is slightly erroneous, as lumber is still maintaining its average price. Growing cities have to be supplied and the mills for a long time have been running at high pressure to feed them.

TIMBER LIMITS

Are in constant request by the Lumberman or Mill Owner and are BE-
COMING SCARCE to obtain.

DELAY IS DANGEROUS

If a Timber Reserve is required, whether the lumber is required for manu-
facture or otherwise. The price of rough lumber averages about \$16.00 per
1000 and dressed fir or pine reaches some \$27.00. Shingles at \$2.50 up.

THE MARKET IS HERE

To take up all future supplies. For a few of the Best Timber Limits now
open apply the

ALBERTA

The Rising Newcastle of North America

WESTERN CANADA is looking to ALBERTA for its Fuel in the future. Up to the present, the Lethbridge Collieries have been sending out coal to meet the wants of the three Prairie Provinces, but the demands have been far in excess of the supplies. Consequently, coal has been retailed at almost *famine prices*; while, in not a few instances, it has been unobtainable. Why is this? Apparently, the large contracts entered into by these Collieries for Winnipeg consumption have had to be considered first; then again, the growth of Western Canada and the people flocking into it have been beyond ordinary conception. In order to meet the requirements of such an extraordinarily expansive territory, further Collieries should be opened up almost immediately.

WE HAVE SOME OF THE FINEST COAL LANDS

Awaiting development. They can be easily mined, as the veins, directly from the surface, appear at regular intervals at the deeper levels. The coal has been examined by experts who have proclaimed it as characteristically ANTHRACITE, and suitable for many purposes.

D. J. Dewar & Co., Financial Agents, Calgary, Alta.

A Few of the Prices Paid for

ALBERTA COAL

	<i>Per Ton</i>
<i>Winnipeg</i>	<i>\$11.50</i>
<i>Brandon</i>	<i>12.00</i>
<i>Regina</i>	<i>13.00</i>

	<i>Per Ton</i>
<i>Saskatoon</i>	<i>\$13.50</i>
<i>Prince Albert</i>	<i>13.50</i>
<i>Calgary</i>	<i>8.50</i>

ALL these Cities and the Towns intervening, have been brought by the three Trunk Railways of Western Canada into direct touch with the Properties herein mentioned. The cost to produce a ton of coal at the Pit's mouth is approximately \$1.40 add to this amount freight charges for each individual Town, and the surplus is easily discernible.

The Saskatchewan market is, probably more important than Alberta. Two hundred and forty miles puts it into Saskatoon, while Lethbridge haul is 57 miles. A large share of Alberta and Crow's Nest coal goes to Winnipeg, Man.

The country lying between Townships 29 west of 4th Meridian is recognised to be some of the finest COAL BEARING land within the Province. Also lying within and surrounded by the most fertile areas of Alberta are points now operating on the minds of the multitude of settlers who are pouring into the West from all parts of the World. And no better financial proposition can be offered than the

DEVELOPMENT OF THESE COAL LANDS

Any one interested in this Industry, before considering other matters, had better put themselves into communication with us. Our Properties are OPEN FOR PUBLIC INSPECTION and can easily be reached, as the line of Railway runs alongside of a portion. The rapid expansion and peopling of the Provinces of Alberta and Saskatchewan is an asset of no mean value to those who have to cater for these settlers, while it is admitted that the most necessary commodity for their comfort is the supply of COAL.

Abstract of Report

MADE BY A WELL KNOWN MINING ENGINEER
upon a Property owned by us in the RFD DEER district

*Seams--Analysis Cost of Mining Markets Coal will average
twelve million tons to the square mile*

D. J. Dewar & Co., Financial Agents, Calgary, Alta.

A FEW FACTS

Western Canada's Timber

THE attention of the Dominion Government has been drawn towards the value of the immense timber reserves which Canada possesses, culminating in a proper and efficient manner of preserving, or conserving their rights. Still, at the present time, there are many golden opportunities open to the Investor or Speculator in Timber.

High prices prevail for lumber of all kinds and wide-awake mill-owners have their eyes open to the advantages of possessing suitable timber areas to keep their engines at work. WE HAVE

MANY VALUABLE TIMBER LIMITS

OPEN FOR INSPECTION

TIES, LOGS and CORD WOOD can be secured at easy convenience; and the wants of a growing population for LUMBER should be the operative medium on those desiring to enter this desirable industry.

D. J. Dewar & Co., Financial Agents, Calgary, Alta.

The rush to Alberta is on, and CALGARY is the first stopping place. This has led to the extraordinary growth in the City's population, which has now reached the 50,000 stage. Being in such close proximity to the Coal Fields, too much importance cannot be given towards the supplying of CHEAP GAS POWER, for heating, light and for industrial purposes. Therefore

Barley	25.35	27.36	23.50

The Canadian Pacific Railway's Irrigation Scheme, in which up to the present some \$5,000,000.00 have been expended, has revolutionized Southern Alberta, and has made intensive Agriculture possible in a large area tributary to Calgary. That means a dense population with Calgary as a centre, consequently **Manufacturing, Distributing, etc.**, and all that goes to make a big City.

For the Best Farm Lands Apply:

SUNNY ALBERTA'S *Farm Lands*

MIXED FARMING is generally considered to be the ideal method for making a farmer wealthy, and the portions of the Province lying between the irrigated areas and the Northern extremity are peculiarly adapted for this line of farming. The Dairy Industry is very important, as the Markets are near. Horse raising, too, is a source of great profit, as the demand exceeds the supply.

COAL

Is considered to be one of the greatest influences at work in determining Settlers to make Alberta their future home. That mineral deposit is known to exist in great quantities over an area covering about some 600 miles from North to South.

COAL IS THE MAINSTAY OF THE THREE PRAIRIE PROVINCES

The Safest Industry in Alberta to-day for the Capitalist is

COAL MINING

We have a few Choice Properties awaiting Development.
Gilt Edged.

Lumber Yards in such a rapidly growing country as Alberta are always kept busy. To supply these Mills the Owners are only too anxious to secure their only source of supply.

THE TIMBER LIMITS

These are getting scarcer every month, so do not delay in sending to us for a List of the Reserves. We have some of the Best in the Dominion.

ALBERTA

The Land of Plenty

PLENTY of Opportunities for the Capitalist.
PLENTY of Rich Agricultural Land for the Farmer.
PLENTY of Dividends Awaiting the Investor.
PLENTY of Bargains for the Man of Small Means.

THE CITY OF CALGARY

Why You Should Come to Calgary

CALGARY is the commercial Metropolis of Alberta, and now others to the Province make this point a stopping place before going to their ultimate destination. In many instances they are so well pleased with Calgary that they remain, which in a large measure accounts for the phenomenal growth, and which places her among the fastest increasing Cities of the world.

Calgary now has a population of 50,000, and by the close of 1911 she will have 75,000, and even the most pessimistic admit she will have over 100,000 five years hence.

Many important industries are already established, making the City's pay roll among the largest in Western Canada.

This will be greatly augmented when the five Transcontinental Railways have completed their entrances into Calgary, and have established their Workshops and Round Houses.

Manufacturers are looking to Calgary—many are already here. Natural Gas is now assured in an unlimited supply, thereby solving the question of Cheap power.

Never before has Calgary faced a year so tremendous in possibilities, and already the Building Permits far exceed any other period in her history. The year 1911 is to be a record one, both for the Province and the City of Calgary, and the time is ripe for intending purchasers to get their money placed so as to take full advantage of future increasing values.

THE HENDERSON LAND COMPANY

Realty Brokers and Financial Agents

P.O. Box 1865

CALGARY, ALBERTA

THERE is no more profitable pursuit than MIXED FARMING if properly carried out. The raising of Cattle in Alberta has long engaged the attention of some of the most experienced Farmers on the continent. The climate is perfect, and no better herbage is to be found. There is a ready market, too, for Poultry and Dairy Produce.

CAMROSE

A flourishing town on Sec 2, Tp 47, Rg 20, west of the 4th Mer., in the electoral division of Strathcona. Situated on the Wetaskiwin branch of the C P R, 25 miles east of Wetaskiwin and on the Vegreville-Calgary line of the C P R 47 miles from Vegreville, also on the Calgary branch of the G T P Ry 25 miles from Tofield. The town has graded streets, a volunteer fire department having a fire engine, a \$10,000 public school, grain elevators, churches of all denominations and numbers amongst its industries a cement block manufactory, a tannery, 2 feed mills and a creamery. The C P R has a dam built across Stoney Creek in the centre of town affording a never failing water supply for domestic use and for electric lighting and power. The Camrose Canadian Club, comprising the business and professional men, and housed in its splendid clubhouse is a dominant factor in the advancement of the town. Camrose is the centre of a most prosperous farming and wheat growing district. Mails daily.

Advertise Your . . . Good Things!

¶ Many a limping business is kept from healthful development by the firm's morbid aversion to publicity.

¶ Perhaps they are honestly so conscious of the excellence of their wares that they expect the busy world to search them out. But the busy world hasn't time.

¶ If you have a good thing to sell, proclaim it. The world wants good things, but it can't discover them in hiding places. Bring them into the open market by advertising them.

At the Alexandra barn the boys
all say

The rigs are brand-new and the
horses gay.

No slow horses there, and this is
no yarn.

For bum rigs don't go at the Alex-
andra barn.

The drivers they have are only
the best.

They know all the country, North,
South, East and West.

The boys at the barn will all treat
you white.

The service is good and the prices
are right.

REMEMBER

The CITY DIRECTORY is the most effective and most economical method of reaching all the people-all the time.

¶ *Those who buy without looking at the list of those who sell do themselves a great injustice.*

¶ *The CLASSIFIED LISTS in the BUSINESS DIRECTORY form the very best BUYER'S GUIDE on earth.*

¶ *A modern, systematized, up-to-date method of getting what you want.*

The Wisdom of Saving Money

must be apparent to any person who gives the subject any thought. A little money saved enables you to take advantage of opportunities for making more money; to buy a lot, to make the first payment on a home, to start in business for yourself. The opportunities come to the man with capital. Saving the small sums is the creation of capital.

GAZETTEER AND DIRECTORY

Edmonton 345

City of Edmonton

(See also Strathcona)

Edmonton is beautifully situated on the high land on the north bank of the Saskatchewan River, 825 miles west of Winnipeg. It is the main wholesale and retail distributing centre for Northern Alberta and the vast Peace River country, which is fast being developed to the north, while to the west three great railroad systems are rushing to completion, lines through the Yellowhead Pass to the Pacific Coast.

The Corporation owns and operates its own water services, sewerage system, electric light and telephone systems. It also owns and operates the street railway, having tracks laid on the principal streets.

Natural gas has recently been discovered at Morinville. This is being piped to the city and will be of great commercial value.

The city has fifteen banks, twenty-two hotels, three daily, five weekly and three monthly newspapers, four saw mills and planing mills, two flour mills, modern brewery, aerated water factory, a seven-story packing and cold storage plant, woodenware factory, three steam laundries and two brick yards; also tent and mattress factory.

Most of the Eastern manufacturers are represented in the city either through commission brokers or with branch warehouses.

Edmonton, being the capital of Alberta, has the Alberta Provincial Government buildings. The new Government buildings cost over 11,250,000.

The city of Edmonton telephone system has all equipment of the latest type as made by Automatic

Electric Co., Chicago, with 10,000 capacity and 3,000 straight lines installed, which number it is expected will be increased by 500 during the current year.

The water is supplied to the city through four pumps, two compound duplex pumps, one a Northey, with a capacity of 1,000,000 gallons, and the other an Inglis, with a capacity of 1,500,000 gals. per 24 hours.

There is also operated in connection with the waterworks system a 4,000,000 gallon filter system, having a sedimentation and coagulation basin capacity 1,500,000 gallons and a clear water basin capacity 500,000. In connection with the filter system are two 4,000,000 gallon direct connected motor driven centrifugal pumps.

Capacity of the elevated steel tank, in the west end of the city is 60,000 gallons.

Present consumption is about 2,750,000 gals. per 24 hours.

Domestic pressure 40 lbs. on hill.
Domestic pressure 100 lbs. on flats.
Fire pressure 80 lbs. on hill. Fire pressure 150 lbs. on flats. If required a fire pressure of 120 lbs. can be obtained in the city and 180 lbs. on the flats.

The city is now preparing to install another 6,000,000 gallon service pump and additional boiler capacity of about 500 H.P.

The Edmonton cemetery is situated about a mile north of Jasper Ave., near the St. Albert trail and consists of 6 acres. A. McNicoll secretary; Edward Pike, caretaker and sexton.

EDMONTON INDIAN AGENCY

This reserve is situated at the
Two Hills, 5 miles south of Edmon-
ton on the Calgary trail, and lies
in Tps 51 and 52, Rgs 23 and 24
west of the 4th Mer. It has an area
of 39.9 square miles, containing
about 26,000 acres. White Mud Creek
flows in a northerly direction through
the southwestern end of the re-
serve and the lands along this
stream are best adapted for cultiva-
tion. There are numerous ponds,
swamps and prairie openings afford-
ing peavine and vetches of great
luxuriance. The soil is a rich black
loam and the greater portion of the

surface is thickly covered with
scrub and poplar, with spruce, birch
and tamarac along the western and
southern boundaries. Strathcona is
the nearest railway station and post-
office. There are 58 families. The
government officials are:

W Verreau agt
George H Race clk
John Foley interpreter
A E Pattison farmer
H Hope farmer

EDNAVILLE

(Now called Iola)

EDSON

A divisional point on the main
line of the G T P Ry, 130 miles
west of Edmonton and 18 miles
west of the McLeod River. Located
on Sec —, Tp 53, Rg 17, west of
the 5th Mer., in the electoral divi-
sion of Edmonton.

Has 2 churches, 3 hotels, 1 bank,
public school, immigration hall, 4
lumber yards, and is the gateway
to the Grand Prairie country.

FORT SIMPSON

A trading post, in Mackenzie Ter-
ritory, situated on the west bank of
the Mackenzie River at its junc-
tion with the Liard River. It was
formerly the headquarters of the H
B Co for the Mackenzie River dis-
trict. Is 1078 miles from Athabasca
Landing. The H. B. Co's steamer
runs between Fort Smith 523 miles
south, to the mouth of the Macken-
zie River, 776 miles north. Mails
4 times a year.

Roman Catholic Mission—Rev Father
Audmaud O M I, Rev Father Vacher
O M I
Anglican Church—Rev H R Day
Hislop & Nagle—Alex Laferte, trader
Joseph Hope pilot
Hudson's Bay Co—A F Camsell clerk
David Kirkley laborer Jas Sibbiston
laborer John Hope pilot
Napoleon Laferte trapper

FORT SMITH

A trading post on Great Slave
River, 16 miles north of Smith's
(Grahame) Landing with which it
is connected by wagon road and
telephone, 555 miles south of Fort
Resolution.

It is the head post of the Macken-
zie River district of the H B Co.

There is clear navigation from
Fort Smith to the mouth of Mac-
kenzie River, by H B Co's steamer
McKenzie River" which sails from
Fort Smith to Fort McPherson;
through trip leaves Fort Smith 1st
July, arrives Fort McPherson 15th
July; returning arrives Fort Smith
1st August, approximately.

Population is small, mostly
Indians and half-breeds, who are
engaged in fur trapping and transport
service. Large salt springs are in
the vicinity but on account of situa-
tion are almost impossible to utilize.

Frank

GAZETTEER AND DIRECTORY

Frank 473

FRANK

A village on the Crows Nest branch of the C. P. R., on Sec. 31, Tp. 7, Rg. 3, west of 5th Mer., in the electoral division of Macleod. Has telegraph and express, customs and money order post office and chartered bank. The Canadian-American Coal & Coke Co., Ltd., is the principal industry. The company have a paid up capital of \$2,500,000 and own four miles of coal lands south of rank. Shipments are 1,000 tons daily. Frank is connected by government telephones with all the principal towns in Alberta.

The water works system (wooden pipes) operated by the coal company, has intake on Gold Creek, 1/4 mile west of town, with a head of 40 feet, giving pressure in town of 50 feet. For fire protection there are 8 hydrants and a supply of hose on reels. The company propose extending the system and increasing the pressure.

GLEICHEN

An incorporated town situate on the main line of the C. P. R., on Sec. 13, Tp. 22, Rg. 23 west of the 4th Mer., 54 miles east of Calgary.

The surrounding country is stated to be inferior to none in the raising of cattle, as can be seen from the very large shipments which take place from this point. The land is fairly level with thick herbage. Farmers, too, grow wheat, which is usually dealt with by the three elevators, having an approximate capacity of 90,000 bushels.

The town has a completely equipped school for its educational progress.

There are no poor in the town, which caters for a large and increasing population outside. Within close range are the natural gas

HOBBEMA INDIAN AGENCY

This reserve is situated at Bear's Hill on the Calgary to Edmonton trail. It is located in Tps 44 and 45, Rgs 23, 24 and 25 west of the 4th Mer. and comprises 61½ square miles containing about 40,000 acres.

It is watered principally by the Battle River which encompasses its southern and eastern boundaries.

The chief feature of the reserve is a heavily wooded ridge called Bear's Hill. There are muskegs and considerable low swampy grounds, with extensive hay meadows, chiefly at Battle River Lake. The soil is of choice quality. The Bear's Hill contains large quantities of spruce and poplar. The eastern portion is chiefly prairie with occasional bluffs of poplar and clumps of willow. Hobbema is the nearest railway station and post office. There are 53 families. The government officials are:

Arthur Mann, agent

Blanche Mann clerk

A W Perry farmer

F W Lucas farmer

G P Ferguson blacksmith

W J Muir engineer

J Gardner interpreter

HOLDEN

An incorporated village on the line of the G T P Ry, 59 miles south-east of Edmonton in the electoral division of Strathcona. Located on Sec 14, Tp 49, Rg 16, west of 4th Mer. Is 25 miles from Vegreville, the nearest telegraph station. Has regular stage service from Vegreville, 25 miles and from Camrose 35 miles. This is a mixed farming locality. Mails tri-weekly.

INNISFAIL

An incorporated town on the Edmonton branch of the C. P. R., 77 miles north of Calgary. Located on Sec 21, Tp 35, Rg 28, west of the 4th Mer., in the electoral division of Red Deer. Has government creamery, 2 chop mills, a weekly newspaper, 2 chartered banks, public school and 5 churches. Is the centre of a thriving mixed farming district, 75 miles east of the Foothills of the Rocky Mountains. The land is well watered and is of the very best quality. The soil is a black, vegetable mold, from 18 inches to three feet in depth, with a clay sub-soil, and an entire absence of rocks and stones. Ranching has always been one of the main industries in this district. The outline of the country, its hills, plains, timber and water, and the abundance of wild hay, present conditions that are highly favorable. Mails weekly.

LAGGAN

A station on the main line of the C P R on Sec 28, Tp 28, Rg. 16, west of the 5th Mer., in the electoral division of Calgary, 117 miles west of Calgary, 525 east of Vancouver and 274 east of Kamloops. It is 6 miles east of the summit of Rocky Mountains (the British Columbia boundary line).

Laggan is one of the popular summer resorts in the Rocky Mountains Park of Canada for tourists and mountaineers. The Chalet at Lake Louise is at an altitude of 5,643 feet above sea level. The greatest peaks and glaciers yet discovered in the Rockies are near the Bow River Lakes north of Laggan. Telephone connection from station to Chalet and also with Field Hotel.

Laggan is the chief starting point for the great hunting district between the Rocky Mountains and Jasper Park which is at present attracting the attention of the tourist sportsman the world over. Increased accommodation at the Canadian Pacific Railway's Chalet 3

Come to CAMROSE, ALBERTA, and enjoy life while you are getting rich. For particulars about this alive town address FRANK P. LAYTON, Camrose, Alberta.

Lethbridge 581

City of Lethbridge

An incorporated city (May 9, 1906), on the Crow's Nest line of the Canadian Pacific Railway, 762 miles west of Winnipeg, 48 miles due north of the international boundary.

It is situated on Sec. 31, Tp. 8, Rg. 21 west of the 4th Meridian, at an altitude of 2,984 feet above sea level and 307 feet above the river level, in the centre of Sunny Southern Alberta of which it is the commercial centre, the home of "Alberta Red" wheat, which has made this district famous. It is also the centre of the famous Southern Alberta coal fields and the distributing point for the Crow's Nest Pass coal mining territory.

The city owns its own electric light and power plant, also the water and sewerage systems.

It is the headquarters of the district court and the district judge resides here. Supreme court sittings are held here regularly.

It is the seat of the Dominion lands office for the district.

It is the headquarters of K Division Royal North West Mounted Police.

It is the chief customs port of Southern Alberta.

The climate is ideal and there is very little winter.

The C. P. R. Crow's Nest line runs through, operating three daily passenger trains each way every day, besides daily passenger trains on the Carman-gay and Cardston branches. The C. P. R. are now building a new line from here to Calgary, the Lethbridge end of which is now in operation to Carman-gay. They are also building the Weyburn-Lethbridge line, which will put Lethbridge on the shortest line from coast to coast. Lethbridge is also a terminal divisional point of the C. P. R.

The C. P. R. viaduct is the longest high railway bridge in the world—over one mile long and 307 feet high.

It is the headquarters and terminal division point of the A. R. & I. Co., which runs south from the city.

It is also the northern terminal of the Great Northern line from Great Falls and Shelby, Montana.

The Canadian Northern has a charter to build to Lethbridge, as also has the Grand Trunk Pacific.

Lethbridge's population is given by the Dominion census of 1906 as 2,313. In December 8th, 1909, a police census showed it to be 6,020, and in December, 1909, a police census again tallied 11,137. No census was taken last December, but the school enrollment records indicate an increase in population during the last year of about 10 per cent.

At Lethbridge are the Galt coal mines, the greatest domestic coal producing mines in Western Canada. Last year they mined 256,000 tons.

Close to the city are the Royal Collieries, the Diamond Mine, the Lethbridge Collieries, Ltd., the Chinook Collieries, Ltd., the Pioneer Mine, and the New Barnest Mine. The four former are spending large sums in development work, and will soon be producing a thousand tons a day each. It is likely each of these mines will employ at least five hundred men.

Coal sells at \$4.25 a ton, delivered in Lethbridge. It can be purchased at the mine by farmers at \$3.25 a ton.

Throughout the district there are small mines at which the farmers can secure coal at as low as \$2.50 a ton.

Slack coal for industrial purposes is sold at 50 cents a ton.

CALGARY - ALBERTA

THE LARGEST REPAIR BUSINESS
IN CANADA

Lethbridge is the industrial centre of Southern Alberta.

It has a number of large wholesale houses and jobbing concerns.

It has six large coal mines.

Three brick yards with an annual output of 7,000,000 bricks.

A \$200,000 brewery plant.

An iron works.

Two flour mills with a daily capacity of 625 barrels.

Steam laundry.

Two large and several smaller planing mills and sash and door factories.

A cigar factory.

And numerous other industries.

Lethbridge cannot be mentioned without reference to its magnificent square, occupying two whole blocks, 10 acres in extent, bounded on the north by the C. P. R. tracks and on the other sides by the business section of the city. Surrounded by trees it affords great pleasure to the people of the city, and the open square gives ample room for games of all description, both to young and others. The Citizens band discourses music from the excellent new stand erected thereon. There are to be extensive improvements made on the park during the present year, which will add much to its attractiveness.

One Worthington horizontal triple expansion duplex pump, 12 and 19 and 30x13½x24 rated at 2,000,000 imperial gallons per 24 hours.

Two John McDougall 6-inch, 3 stage vertical turbine pumps, rated at 750 imperial gallons per minute each at

1,150 r.p.m.; driven by two Allis-Chalmers-Bullock, 150 h.p., 2 phase 2,200 volt motors.

Two John McDougall, 6-inch single stage horizontal turbine pumps for boosters, driven by Allis-Chalmers-Bullock 50 h.p., 2 phase, 2,200 volt, motors at 1,150 r.p.m.; rated at 750 gallons per minute each.

The two 3 stage pumps operate at a normal pressure of 165 pounds per square inch, which gives a pressure of about 40 pounds in the city.

The two booster pumps are in a by-pass around a check in the discharge from each of the other pumps; for fire purposes the valves in the by-pass are opened and the booster started, when it takes the water from the other pumps at 165 pounds pressure and increases it to 225 pounds.

The pumps are nearly 300 feet below the level of the city.

The electric light plant was entirely rebuilt at a new site beside the present water works pumping station. A new fire proof building, constructed and two new boilers, one new 350 kilowatt generating set and one new 2,000,000 gallon per day water works pump installed in addition to the existing boilers and machinery.

LLOYDMINSTER

An incorporated town and a village, each having their separate public bodies, on the main line of the C. N. R., 657 miles west of Winnipeg, 85 miles west of North Battleford and 170 miles east of Edmonton. The town is located directly on the 4th meridian, the boundary line between the provinces of Alberta and Saskatchewan, and lies equally in each. Three surveys have been made of the town limits, one for Alberta, one for Saskatchewan, and one for the line. It is situated in Tp. 50, Rg. 28, west of the 3rd Mer., in the electoral division of Lloydminster, province of Saskatchewan, and in Tp. 50, Rg. 1, west of the 4th Mer., in the electoral division of Victoria, province of Alberta.

Lloydminster is the market town for a splendid agricultural section and has up-to-date buildings and stores of all kinds, lumber yards, machinery and implement houses, an electric light and power plant, 3 grain elevators, a flour mill (daily capacity 125 bbls), 2 banks, 3 hotels, 2 graded schools, a weekly newspaper, churches of all the leading denominations, telegraph and local and long distance telephone service. Mails daily.

Come to CAMROSE, ALBERTA, and enjoy life while you are getting rich. For particulars about this alive town address FRANK P. LAYTON, Camrose, Alberta.

MACLEOD

ALBERTA'S FAR-FAMED *Wheat Lands*

The Most Productive throughout the World. Holds the Record for the Highest Average Yield Per Acre.

MACLEOD IS THE DISTRICT WHICH SUPPLIED THIS WONDERFUL WHEAT CROP OF
65 Bushels to the Acre

THE BEST SETTLERS are making Macleod their headquarters. Get ready before all the choice land is taken up. A few years' work now means the securing a competence for the near future, as land values are rising rapidly.

Over 1,000,000 bushels of Wheat were handled by Elevators in one year from a small district surrounding Macleod.

Climate unequalled, while the open prairie with the adjacent Rocky Mountains makes life worth living.

LAND IS NOW SELLING AT \$25.00 AN ACRE

And in a short time will be worth Double that Price

Some of the most successful Farmers in the West owe their satisfactory position to being located in SOUTHERN ALBERTA. The rush for these choice spots is on, and this part of the Province is receiving immediate attention from the expert grain grower.

MACLEOD

The Home of the Red Fife Wheat

Most pleasantly situated a few miles East of the Foothills of the Rockies is surrounded by some of the most fertile land in Southern Alberta. An important divisional point of the C.P.R., all express trains through to the Crow's Nest Pass make it a stopping place; and in consequence it receives a considerable amount of traffic throughout the year. This will be indirectly augmented upon the entry of the other great Trunk Lines, viz. the G.T.P. and the C.N.R., into the place, which is expected to be in the fall of 1911.

The New Viaduct recently constructed at Lethbridge brings Macleod in closer proximity with the United States, which is now sending forth streams of wealthy Settlers into Alberta.

MEDICINE HAT, ALTA.

The Manufacturing City of Western Canada

Offers Power cheaper than any other city in the world.

Public utilities controlled by the Municipality.

Lies in the midst of a vast track of fertile land now in the course of being made irrigable by the C.P.R. and the Southern Alberta Land Co.

Climate unequalled for Wheat raising and cattle rearing.

Power at \$2.40 per horse power per annum.

Has the largest Natural Gas reserves on the continent.

Rates for Manufacturers 5 cents per 1000 cubic feet.

For domestic purposes 13½ cents per 1000 cubic feet.

Present saving to C.P.R. through the use of Natural Gas \$106,000.00 per year.

Rock pressure 600 lbs. to the square inch.

ANALYSIS OF GAS:

Methane 99.49 Hydrogen .51
Oxygen trace Absolutely dry
B.T.U. percentage 1100

Assessment, 1909 \$5,000,000.00
1910 5,510,958.00

Or an increase of over half a million in one year.

Why Is This?

"ALL HILL FOR A BASEMENT"

Come and Live on the GROUND FLOOR

INDUSTRIAL MEDICINE HAT

ONE of the largest and most important Industries in the Dominion, the Alberta Clay Products Company, in 1909 installed its plant sufficient for a *Daily Output of 200,000 Bricks and 21,000 Six-inch Sewer Pipes.* The best of fancy bricks and drain tiling is turned out from these works, which find employment for 350 hands. A further increase is anticipated.

Alberta Products Exhibit

No less important than the above, although not giving employment to as many hands, is the Milling Industry, which is kept running at high pressure in consequence of so much land in the vicinity being put in cultivation.

The Alberta Rolling Mills Co., Ltd., are opening their big plant on May 1st, 1911, employing upwards of 100 men.

The Alberta Linseed Oil and Paint Co., Ltd., are installing their factory here which means a home market for the raising of flax.

Agreements have just been signed with the Gordon Nail and Wire Company, of St. John, N.B., who are removing their entire Plant to this City.

The Alberta Foundry and Machine Shop Company have also located in this City.

The Rosery Flower Company have five acres under glass, and is one of the largest greenhouses in the West.

The location of these big industries means employment for upwards of 700 men.

FOR ALL INFORMATION WRITE

The Secretary, Board of Trade, Medicine Hat

The City for the Manufacturer

Industries Arriving

Linseed Oil and Paint Factory
Glass Factory
Large Smelting Works
Foundry and Machine Shop

Efficient Staff of 25 Teachers
The New High School with its
spacious auditorium and fully equip-
ped Science Department is second
to none in the West. Specialists
in all branches.

What the C. P. R. is Doing

The Canadian Pacific Railway
Company is expending upwards of
half a million dollars on improve-
ments for the spring of 1911, in-
cluding a double track for extend-
ing the depot, new freight sheds
and yards, etc.

City of Medicine Hat

An incorporated city delightfully situated in a picturesque spot on the banks of the South Saskatchewan river at the crossing of the main line of the C.P.R.—It was incorporated as a city on June 9th, 1906, and is located on Sec. 31, Tp. 12, Rg. 5, west of the 4th Mer. in the electoral division of Medicine Hat, 660 miles west of Winnipeg and 800 miles east of Vancouver.

The city is thoroughly modern and up-to-date in every way, having graded and well paved streets, sewerage and water supply systems both for fire protection and for domestic use. One of the greatest advantages Medicine Hat has over her sister cities is the prolific flow from her three natural gas wells, which serve for lighting and giving heat and power to the city. The average pressure of these wells is 800 lbs. per square inch, supplying the enormous amount of 8,250,000 cubic feet of gas per day. For domestic purposes the gas is supplied at 15 cents per 1,000 cubic feet and for manufacturers at 5 cents. A very vicinity of the city. Medicine Hat is thus blessed with the essentials of a manufacturing and commercial element.

Apart from this, the locality is favored as being one of the greatest cattle and sheep raising districts of the west. It would be difficult to discover anywhere finer conditions for successful mixed farming than exist here. The climate is conducive to health, the city being situated at a mean altitude of 2171 feet above sea level. The snowfall is lighter, the temperature equable

and the winter season shorter in Medicine Hat and vicinity than anywhere else in Canada east of the Rocky Mountains. The Chinook winds which periodically prevail, quickly change the climate from winter to summer temperature in a few hours. The city is protected by the surrounding hills which shelter it on all sides.

In order to further enhance the fertility of the soil and to guarantee a crop irrespective of rainfall, a complete system of irrigation canals is in course of engineering in Alberta. A veritable network of canals permeates the section of country bordered on the east by Medicine Hat, on the north and west by Calgary and on the south by the Lethbridge district. The Southern Alberta Land Company, Ltd. (an English organization), holds 400,000 acres for irrigation purposes within this territory. Their immense ditch or channel will find water for large numbers of farmers in the vicinity, who have already begun to assemble.

Medicine Hat is one of the most important divisional points on the western lines of the Canadian Pacific Railway, being the headquarters for the Crow's Nest section. The roundhouse and workshops employ a large force of men, the monthly payroll at present being nearly \$160,000. Large additions are expected to be made this year to these shops. The railway crosses the South Saskatchewan river here on a magnificent steel bridge, one of the longest of its kind in the west, the river being about 1200 feet wide at this point.

NANTON

An incorporated town on the Macleod branch of the C P R, 57 miles south of Calgary. It is situated south of Mosquito Creek, on Sec 15, Tp 16, Rg 28, west of the 4th Mer. in the electoral district of Macleod, in the midst of a magnificent farming and ranching district which has fine soil and excellent water supply.

The town has good public buildings, stores of various kinds, lumber yards, implement houses, grain elevators, chartered banks, a theatre, public graded schools, churches of all the leading denominations and

local and long distance telephone service. To the south and southwest of town are some of the largest stock ranches in the west, whilst to the northeast and southeast, the country is well settled by farmers. Mails daily.

Population, 1911—700.

Town Council:

Mayor—W D Ransom.
Sec. treas.—William Robertson
Councillors—W. J. Greig, Dr. Keen,
D. M. Duggan, J. Armstrong, Walter
L. Walt, George B. McKay.

Board of Trade:

President—F. T. Hallett
Sec. treas.—G. S. Ferris

Public School Board:

Chairman—J. E. H. Curtis
Sec. treas.—C. H. Marshall

Trustees—Rev. A. C. Bryan, J. S. Blake, H. H. Dawson, John Burnett.
Lodges, Secret Societies, etc.

ONION LAKE AGENCY

This reserve is situated about 8 miles northwest of Ft Pitt on the trail to Edmonton via Onion Lake. It lies in Tps 54 and 55, Rgs 27 and 28 west of the 3rd Mer. and Rg 1 west of the 4th Mer., being thus in the provinces of Alberta and Saskatchewan. It comprises an area of 22 square miles, containing 14,080 acres. The surface is rolling and interspersed with bluffs of poplar and shrubs, alternating with lakes and ponds. The northern portion has valuable hay marshes. The soil is good but of light quality. Onion Lake is the nearest postoffice and Lloydminster 30 miles south on the C N R is the nearest railway station. There are 27 families. The government officials are:

W Sibbald agent
Lang. Turner clerk
L J Slater farmer
Joe Taylor miller
John Bangs interpreter
R Pratt asst farmer

ONOWAY

A post settlement on Sec 34, Tp 54, Rg 2, west of the 5th Mer., in the electoral division of Edmonton. Is 40 miles from Edmonton and 18 miles from Stony Plain the nearest railway and telegraph station. Is reached by regular stage and by livery. Has English, Methodist and Roman Catholic missions. Mails semi-weekly.

PEACE RIVER CROSSING

A settlement on the Peace River, 87 miles from Lesser Slave Lake by wagon road, 300 miles from Athabasca Landing, the nearest telegraph office, and 400 miles northwest of Edmonton; the nearest railway and banking town. Mails monthly by stage. Has two mills, one flour and shingle and one lumber, shingle and flour.

The valley here is 1,200 feet below the level of the prairie, about 15 miles long and principally settled by half-breeds.

This is the distributing point for all points both north and south on the Peace River. H B Co and R C steamers navigate the river down to Vermilion Chutes, 325 miles, and up to Hudson's Hope, 236 miles; total distance, 561 miles. Grain is reported to have ripened annually for the past 25 years at the R C Mission farms in the valleys. There are no sudden changes in the climate. Chinook winds extend their influence frequently.

Population—30 whites and 200 half-breeds

PEACE RIVER DISTRICT

This district in Athabasca Territory watered by the Peace River and its tributaries consists of two distinct valleys viz the Upper and the Lower. The latter has for its main centre Fort Vermilion. The country tributary to this post is about 250 square miles in extent. It has a very moderate climate, any extreme rigor being prevented by the sheltering mountains, and the prevalence of warm Chinook winds, the springs being as early and the autumn as late as in the country about Edmonton. The country is well timbered and well watered, with plenty of sunshine, sufficient but not excessive rainfall, in fact an

Ideal country for mixed farming. Transportation is made possible by the enterprise of the Hudson's Bay Co in placing steamers on the Peace River and by the Government in the opening of colonization roads. At Fort Vermilion there is a white population of about 100. The H B Co and Breden & Cornwall have trading posts. Both the H B Co and R C Mission have a flour mill and a saw mill. There is located a R C Mission and school and an English Church Mission. A splendid road is opened between the Fort and the Chutes of the Peace River a distance of 60 miles.

PEARCE

A post office on Sec 1, Tp 10, Rg 25, west of the 4th Mer. in the electoral district of Macleod. It is about 8 miles northeast of Macleod. On the Crows Nest section of the C. P. R.

PEIGAN INDIAN AGENCY

(See also Brocket)

This reserve is situated on Crow Lodge Creek and Old Man's River, near the foot of the Porcupine Hills about 6 miles southwest of Macleod. It comprises 181.4 square miles, containing about 116,000 acres. It extends from Rg 27 west to Rg 29 and from Tp 6 north to Tp 8, west of the 4th Mer. The country is partly high rolling prairie of clay loam, large fine hay meadows and river bottoms of dry whitish clay which produces good crops of roots and grains. The reserve is watered by Old Mans River, Olsen, Beaver and Crow Lodge Creeks and several large running springs. It is one of the finest cattle ranges in the north-west.

It has Anglican mission and school and Roman Catholic mission, school and convent. Brocket on the Crows Nest branch of the C. P. R. is the nearest railway station and post-office. Has 193 families. The government officials are:

PINCHER CREEK

An incorporated town 2½ miles south of the C P R station called Pincher, on Sec 22, Tp 6, Rg 30, west of 4th Mer., in the electoral division of Macleod, on the Crow's Nest branch of the C P R, 173 miles west of Dunmore Junction and 29 miles west of Macleod. Pincher Creek is one of the oldest and best settled ranching districts in Alberta. Recently the ranchers have been putting in winter wheat and the acreage in the district is increasing rapidly each year, all conditions being favorable for good crops. Has public school, Catholic convent, a public hospital, 2 chartered banks, a weekly newspaper, flour mill and elevator, and electric light system and waterworks, water being obtained from the creek, 2½ miles up and brought into the town by gravity. Pincher Creek is the business town for the following local points: Peigan Reserve, (7 miles east); Dry Forks, (9 miles south); Summerview, (10 miles north); Mountain Hill (12 miles northwest); Fishburn, (2 miles southeast) and Yarrow (20 miles south).

RAYMOND.

An incorporated town (July 1st, 1903), on the Alberta Railway & Irrigation Co's line, 27 miles from Lethbridge.

The town is situated on Sec 8, Tp 6, Rg 20, west of 4th Mer., in the electoral division of Medicine Hat, and is the centre for a well settled agricultural and ranching country.

The Knight Sugar Co., Ltd., is the principal industry. The beet sugar factory has a capacity of 400 tons per day. The company owns about 400,000 acres of farm and ranch land, and 12,000 head of cattle, ranging in Milk River Ridge. The cultivation of the sugar beet is past the experimental stage in Alberta. As high as \$100 per acre was realized in some instances. Raymond has a branch of the Alberta Railway & Irrigation Co's St. Mary's canal passing through the townsite and will be on the main canal from the Milk River. Three miles south a reservoir covering 30,000 acres with a depth of 30 feet, will be constructed. This will furnish Raymond with a waterworks system.

There is a telephone connection with Lethbridge, Sterling (7 miles east), Magrath (12 miles west) and Cardston. Welling settlement, 6 miles northwest) is tributary to Raymond.

Has chartered bank, weekly newspaper and public school.

A large opera house has been completed this year. Also used as a roller skating rink. Malls daily.

Population—2,000

Elevator capacity—100,000 bushels.

Flour mill capacity—150 bbls daily—

RED DEER

An incorporated town (July 1901)
on the Edmonton branch of the C P R
94 miles north of Calgary and 98
miles south of Edmonton. It is lo-
cated on Sec 17, Tp 38, Rg 27,
west of the 4th Mer in the electoral
division of Red Deer. The town
which was first settled in 1801 is the
centre of a large and well settled
country devoted to farming and stock
raising. Its situation on the Red
Deer River is beautiful, the surround-
ing slopes being wooded with spruce,
poplar and other varieties of timber
leading to the level and rolling open
prairies. Has 4 banks, two weekly
newspapers, 5 churches, public school
and a thoroughly installed up-to-date
high school, a well equipped public
hospital and opera house (seats 500),
1 overall factory, 1 saw mill with
capacity of 45,000 feet per day, 2
brickyards with modern plants, ca-
pacity 75,000 per day and a govern-
ment creamery and also complete
waterworks and sewerage system.

A private company furnishes elec-
tric light and power by steam plant
which is also used as a pump station
for town waterworks. Has town and
rural telephone exchange and long
distance connection both with Calgary
and Edmonton and all intermediate
points.

Red Deer is the divisional point on
C P R between Calgary and Edmon-
ton and is the business town for the
following country points: Burnt Lake
(9 miles W); Solheima (14 miles W)
and Evaris (Medicine River 25 miles
W); Hillsdown (16 miles E); Ed-
well (20 miles S E); Pine Lake (25
miles S E); Coal Banks (28 miles E)
Content (Tail Creek 35 miles E) and
Buffalo Lake (30 miles N E).

SADDLE LAKE INDIAN AGENCY

This reserve is situated north of
the North Saskatchewan River in
Tps 57 and 58, Rg 10, 11, 12 and 13,
west of the 4th Mer and comprises
113 square miles containing about
75,000 acres. There are several
small lakes within its confines, the
larger two being Saddle Lake and
Duck Lake. The reserve has a
frontage of about 6½ miles along
the north bank of the North Sas-
katchewan River, in which section
there are fine large poplars with
groves of spruce and tamarac. The
southeastern portion of the reserve
is level and partially wooded with
poplar, willow and a few spruce.
The northwestern part is undulating
and hilly and partially covered with
poplar and scrub, with a few hum-
mocks of spruce here and there.
There are extensive hay meadows
and the lakes and creeks contain
good water. The soil is generally a
rich black loam with clay sub-soil.
Winged game is very plentiful and
Saddle Lake abounds in whitefish
and pike. The Snake Hills are a
prominent feature, rising to an ele-
vation of 300 feet above the river
and occupying an area of 6 square
miles of splendid grazing land.

Saddle Lake postoffice, at the
northwest corner of the reserve is
the mailing point and Vegreville,
about 30 miles south on the C N R,
is the nearest railway station.
There are 132 families. The gov-
ernment officials are:

SARCEE

A postoffice on Sec 6, Tp 31, Rg 21, west of the 4th Mer in the electoral district of Red Deer. It is about 45 miles due north of Glenora.

Postmaster—Wm C McCutcheon

SARCEE INDIAN AGENCY

This reserve is situated on Fish Creek about 8 miles southwest of Calgary and comprises Tp 23 in Rgs 2, 3 and 4 west of the 5th Mer. It has an area of 108 square miles containing about 69,000 acres. It is well watered by Fish Creek and the Elbow River as well as numerous small streams, which drain into them. There are many hills and valleys and a considerable portion is overgrown with scrub. The western portion of the reserve is partially covered with willow, poplar and spruce. The soil is a black loam, with clay sub-soil rich in herbage. Midnapore, 4 miles distant is the nearest railway station and Calgary, 8 miles distant is the nearest telegraph and postoffice. Has 112 families. The government officials are:

G A McNeill agent
Wm Gordon clerk
George Hodgson farmer
Joan One Spot chief stockman
James Starlight chief herder
Norman Sarcee herder
Little Billy herder

miles from Morinville, the nearest railway station. Is reached by steamboat in summer and by trail stage in winter. Fishing, farming and ranching are the main industries. There is an abundance of coal, good timber and large areas of blue joint hay. Also indications of gold in some of the streams. The scenery on the lake is beautiful, and it affords most excellent advantages for hunting, fishing and boating. A telegraph line has just been completed, connecting at the mouth of Little River. There is a Hudson's Bay store, two feed stables, a R. N. W. M. P. barracks and Roman Catholic Church. M. P. S. on monthly.

SMITH'S LANDING

(Also called Graham's Landing.)

On Great Slave River, (which connects Lake Athabasca with Great Slave Lake), 100 miles north of Fort Chipewyan, and 529 miles from Athabasca Landing. It is 16 miles south of Fort Smith, with which it is connected by wagon road and long distance telephone. There is a settlement of half-breeds who are engaged in fishing, boating and trapping. The Hudson's Bay Co.'s steamer "Grahame" runs south across Lake Athabasca to Fort McMurray on Athabasca River, 280 miles south. Has Roman Catholic mission.

lakes and springs as well as coulees and also two good-sized lakes of excellent water. North of the Bow River the reserves are hilly and partially wooded with pine, spruce and poplar. There are small tracts of rich arable soil in the hills but most of it is only fit for grazing. The portion of the reserves lying south of the Bow River has ranges of hills rising to an elevation of 800 feet above the river which are thickly wooded with pine, spruce and poplar. There are stretches of level bench land affording rich pasturage and high rolling prairie well adapted for grazing purposes. The main line of the C P R crosses the reserves just south of the Bow River, for a distance of 17 miles. Morley, the postoffice and railway station, is on the C P R just south of the agency post. There are 71 families. The government officials are:

GAZETTEER AND DIRECTORY

Strathcona 811

City of Strathcona

Incorporated as a City in 1907, situated at the terminus of the Calgary and Strathcona branch of the Canadian Pacific Railway 192 miles north of Calgary on the south bank of the Saskatchewan River 200 feet above the water at an elevation of 2,158 feet above sea level.

Strathcona is the gateway to the Great North Country of agricultural and mineral wealth, and is the distributing point of that country.

To the south and east there is an agricultural country which produces splendid crops of wheat, oats and barley, the average yield for Central Alberta being: wheat, 25 bushels; oats, 60 bushels, and barley, 40 bushels per acre. Yields of 800 bushels of potatoes per acre are not uncommon.

All kinds of vegetables do well, their quality being marked by the fact that the Strathcona exhibit took first prize at the Dominion Fair held in Westminster in 1907, and likewise eleven first prizes out of twelve entries for grain, 1910.

The chief industries in the district are coal mining of which there are no less than 18 mines in active operation, with an export output of 55,000 tons per month and with unlimited supplies in sight.

Amongst other important industries in Strathcona are two large saw mills with a yearly cut of 20,000,000 feet of lumber and employing 200 men.

Also three packing plants, four brick yards, an iron foundry, one brewery, one oatmeal mill (capacity of 200 barrels per day), one flour mill (150 barrels per day), four elevators, capacity 400,000 bushels.

The City of Strathcona has, Population—6,500

Assessment—\$7,074,225

Paved streets, 1 mile

Cement sidewalk, 3 miles

Water mains—15.12 miles

Sewers—12.61 miles

Pink sidewalks—24 miles

School attendance—1,079

An elevator capacity of 155,000 (this does not include the mills)

One flour mill

One oatmeal mill

Creamery

Three brick making plants

Two saw mills with a capacity of 150,000 feet per day

Two sash and door factories

Three lumber yards

Five hotels

Three banks

Five general stores

Three drug stores

Three hardware stores

Four livery barns

The Provincial University

Strathcona is the divisional point of the Canadian Pacific Railway, having a pay roll of over \$50,000 per month.

The new line from Sedgewick (or Killam) joining the C. & N. branch at Ellerslie will give a direct line to Winnipeg via Saskatoon.

The Canadian Northern have access to the city and are connecting the city with their main line at Negreville. They are also building from Strathcona to Camrose.

The city has a very up-to-date fire fighting apparatus and have an almost unlimited supply of water from the city. The brigade consists of 20 volunteer firemen.

The city owns and operates its own electric light plant, also its water system. An electric power plant, 900 arc lamps, 66 amp. and 2,000 incandescent lamps for domestic service.

The telephone system is automatic with connections with government long distance lines. Is central of rural lines in the district, extending in all directions for an average of 10 miles.

Central Park is a fine driving and athletic park in the suburbs which make splendid recreation grounds in the summer. The City owns three other parks.

Winter sports are provided for by good skating and curling rinks.

The "University" city has a Collegiate Institute, three public and one separate school. At present the University classes are held in the new Collegiate building.

Value of school buildings:

Duggan St.	\$35,000
Grandin St.	\$10,000
Collegiate	\$82,500

The Strathcona-Edmonton Viaduct (under construction) will have a length of 2,706 feet and be 160 feet above water level.

Mill Creek Bridge, Whyte Avenue East, in course of erection, costing \$38,000.

STRATHMORE

A station on the main line of the C P R, 35 miles east of Calgary. Located on Sec 14, Tp 24, Rg 25, west of the 4th Mer., in the electoral division of Calgary. The C P R Irrigation works headquarters for section embrace the whole of the district. Land is well taken up by settlers who find a ready market for their produce. Poultry raising and horse gardens are profitably worked here. There is good train service. Has 3 elevators, cap. 90,000 bu. A sugar beet factory is in course of construction. Mills twice daily.

A summer resort on Sec 32, Tp 38, Rg 1, west of the 5th Mer. in the electoral division of Red Deer. Is 15 miles from Red Deer, the nearest railway, telegraph and express. Reached by stage, and by livery. Mail semi-weekly.

Postmaster—Alex Loisel

Archambault Bros gen store, telephone office and feed stable

TABER

A station on the C P R's Crow's Nest line, situate 31 miles east of Lethbridge. Incorporated as a township in 1907, it lies within the precincts of a large coal-bearing area and has 14 mines working, which find employment for over 600 men.

The present assessment roll of town amounts to nearly \$900,000.

Great wheat crops have been harvested here, while successful borings for natural gas indicate that this power will materially benefit the town in the near future. Has chartered banks, a weekly newspaper, scholastic institution and other useful adjuncts.

Postmaster—H P Munroe
